(54) Title: LINEAR SCATTER JACKPOT METHOD AND SYSTEM

(57) Abstract: A method for awarding a jackpot, and a corresponding gaming machine and system are disclosed. The jackpot is awarded based upon the presence of scatter symbols appearing in the game outcome in a predefined manner. The jackpot is preferred linked across multiple machines. In a preferred form, scatter symbols on one reel may be in an active or inactive state, the jackpot is awarded only if they are in the active state, and the probability of them being in an active state is dependant upon the size of the player's wager, so as to provide linear returns to players.

For two-letter codes and other abbreviations, refer to the "Guidance Notes on Codes and Abbreviations" appearing at the beginning of each regular issue of the PCT Gazette.
